DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to method, classified in class 216, subclass 83.
 - II. Claims 9-16, drawn to apparatus, classified in class 156, subclass 345.27

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed in claim 1 can be practiced by another materially different apparatus where the substrate transport step is performed manually.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with James Finder on 9/29/05 a provisional election was made without traverse to prosecute the invention of Izuta, claims 9-16. Affirmation of this election must be made by applicant in replying to this Office action.

Art Unit: 1765

Claims 1-8 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
